# Turbine Type Mixers

**PiTAC GULF (FZC)**

**DZB 300 -500 TECHNICAL DATA**

	DZB 300	DZB 500	DZB 800
Filling quantity liters	150	750	500
Filling quantity (loose aggregates) kg	240	480	800
Compacted concrete output per cycle m <sup>3</sup>	0,10	0,20	0,33
Drive power mixer kW	4	7,5	11
Weight of mixer without skip	550	700	900
Mixer pan diameter mm	1000	1300	1500
Drive power skip kW	1,5	2,2	3

Pan mixers type DZB 300- 500 are used for mixing dry and wet concrete for various applications: smaller capacity of stationary and egglayer block making machines, some kinds of mini batching plants and other applications regarding mixers technical data. All mixer types are driven by hi heavy duty planetary gear reducers manufactured by Italian company Dinamic Oil. Wearable parts of mixer are from anti wear steel, mixer blades can be done in three wearing levels: Casted Mn steel, Casted NiHard steel, Polyurethane .
